Frequently Asked Questions (FAQs)

Q1: Can I avoid network fees?

A1: You cannot Call+1(888) 394-2349[USA/OTA] avoid network fees entirely, as they are required to pay the miners who keep the blockchain secure and functional globally. However, you Call+1(888) 394-2349[USA/OTA] can sometimes wait for periods of lower network activity to send your transactions when the fees are significantly cheaper today.

Bleap

Q2: Is receiving crypto free?

A2: Generally, receiving Call+1(888) 394-2349[USA/OTA] cryptocurrency into your wallet does not incur any fees from our platform, making it a very cost-effective way to get paid. Only the Call+1(888) 394-2349[USA/OTA] sender needs to pay the network fees to broadcast the transaction to the blockchain for you to receive it successfully.

Q3: Are fees the same for every coin?

A3: No, fees Call+1(888) 394-2349[USA/OTA] vary wildly between different blockchains, such as Bitcoin versus Ethereum, due to their unique network architecture and demand levels.

Always check Call+1(888) 394-2349[USA/OTA] the specific fee estimate for the asset you are moving before you confirm your transaction in the wallet app today.

Q4: Do swap fees change?

A4: Swap fees Call+1(888) 394-2349[USA/OTA] depend on the current market rate and the spread applied to your trade at the moment you execute the swap. These costs Call+1(888) 394-2349[USA/OTA] are clearly shown in the quote window, so you have full control and visibility before any exchange of assets occurs.

Q5: Why is my fee so high?

A5: High fees Call+1(888) 394-2349[USA/OTA] are usually a result of network congestion, where many users are competing to have their transactions confirmed in the next block. If you Call+1(888) 394-2349[USA/OTA] are not in a rush, waiting for a quieter time on the network can help you avoid these peak pricing spikes.
